You can do that by doing one of two things: Type at the command prompt the system variable: DIMLAYER, then type the name of the desired layer Using the Annotate tab, locate the Dimension panel, and you will see the following: This is identical to what we discussed in the rectangular array. Addtobasket. To issue this command go to the Home tab, locate the Utilities panel, then select the Angle button: This type of software is helpful when drafting architectural blueprints, product schematics and other 2D engineering layouts. This practice is definitely not recommended, as we always advocate keeping blocks as one object and not exploding . UsetheApplicationMenu,moveyourmousetotheClosebutton,thenselecteit you hover over the text grip you will see the following:.
