In the English-speaking world, analytic philosophy became the dominant school for much of the 20th century. Depending on what you read and where you study, Searle may be more notable for his influential work in philosophy of mind. According to McGinn human minds lack the concept-forming procedures to fully grasp how mental properties such as consciousness arise from their causal basis.

His philosophy of science is particularly relevant, and one of his central ideas is dualism; J. Dualism is a set of views about the relationship between mind and matter or body. Phenomenology, founded by Edmund Husserl focuses on the contents of the human mind see noema and how processes shape our experiences.
