If you learn only one thing from this site it should be this; look for obvious price action patterns from key horizontal levels in the market. Significant hardware and software purchases are typically required to successfully implement these strategies. Namely, new highs may not result in a new uptrend, and new lows may not result in a new downtrend. Using an intermediate time frame usually a few days to a few weeks swing trader. The first two strategies we will show you are fairly similar because they attempt to follow trends. The risk can be managed by using spot rate to determine the spot rate between the currencies of your trading account and quote currency. This is because you can comment and ask questions. Finding the perfect price to avoid these stop runs is more art than science. The Bottom Line.
